Education for Sustainable Development:
Partners in action

Halfway through the Global Action Programme on Education for Sustainable Development
UNESCO Education Sector

Education is UNESCO’s top priority because it is a basic human right and the foundation on which to build peace and drive sustainable development. UNESCO is the United Nations’ specialized agency for education, and the Education Sector provides global and regional leadership in education, strengthens national education systems and responds to contemporary global challenges through education with a special focus on gender equality and Africa.

The Global Education 2030 Agenda

UNESCO, as the United Nations’ specialized agency for education, is entrusted to lead and coordinate the Education 2030 Agenda, which is part of a global movement to eradicate poverty through 17 Sustainable Development Goals by 2030. Education, essential to achieve all of these goals, has its own dedicated Goal 4, which aims to “ensure inclusive and equitable quality education and promote lifelong learning opportunities for all.” The Education 2030 Framework for Action provides guidance for the implementation of this ambitious goal and commitments.
The Global Action Programme (GAP) on Education for Sustainable Development (ESD) is a concrete response to the urgent need for a new way of living that respects the limits of our planet’s resources while enhancing our collective well-being.

The programme builds on the momentum created by the UN Decade of Education for Sustainable Development (2005-2014), by scaling up action at all levels and areas of education and learning, to accelerate progress towards the Sustainable Development Goals (SDGs).

Under the stewardship of UNESCO, Sustainable Development Goal 4 and the Education 2030 Agenda recognize the transformative power of education in relation to all other SDGs. Target 4.7 in particular calls for key ESD themes to be mainstreamed in curricular content, teaching practices and assessments, and for ESD to be given greater importance in policy planning.

To this end, a network of around 90 GAP Key Partners, which includes governments, civil society organizations, stakeholders from the private sector, and academia, are working in five interconnected Priority Action Areas: advancing policy, transforming learning environments, building capacity in education, empowering youth, and accelerating sustainable solutions at the local level to advance the implementation of the five-year programme (2014-2019).

This brochure illustrates key findings and achievements from a monitoring exercise conducted by UNESCO at the halfway point of the initial phase of the GAP. Key partners reported on their progress as of 2016 for 10 indicators -- two in each Priority Action Area -- and toward their target for 2019 which was set as part of their initial commitment.

The data summarised here show remarkable progress and suggest that GAP Key Partners and other stakeholders are acting as catalysts for a wide range of ESD efforts. A clear learning agenda has emerged that will inform the second part of the programme and help ensure that ESD evolves, stays relevant and adds value to the full spectrum of Sustainable Development Goals.
Key partners are scaling up concrete actions to implement ESD in support of the Education 2030 Agenda and all SDGs.

- **432** strategic policy documents supported
- **701** programmes providing technical support for policy development, implemented at the country level
- **73,143** schools supported
- **2,458,054** learners supported
- **1,540,400** teacher educators participated in capacity-building activities
- **14,873** teacher training institutions supported
- **1,718,889** youth leaders supported
- **626,192** youth leaders trained as trainers
- **1,192** networks/civil society organizations conducted ESD activities
- **745** local activities/programmes established by local authorities
In 2014, GAP Key Partners made commitments in five Priority Action Areas, each measured by two indicators. Key partners were expected to reach 40% of their target for each indicator by the end of 2016. According to the data collected as part of the mid-term monitoring report, partners exceeded their planned activities by 20% in most areas. In some areas, targets have been exceeded by 40% or more, particularly for partners working directly with schools, engaging teachers and trainers, as well as civil society organizations.

Achievement rate for all key indicators from 2015 to 2016

Advancing policy

GAP Key Partners are active...

In 132 countries, Key Partners, including policy-makers, civil society organizations and intergovernmental organizations, are mainstreaming ESD into both education and sustainable development policies, laying the foundation for a sustainable future.

Africa: Angola, Benin, Botswana, Burkina Faso, Cameroon, Chad, Comoros, Congo, Côte d’Ivoire, Democratic Republic of the Congo, Ethiopia, Gabon, Gambia, Ghana, Guinea, Guinea-Bissau, Kenya, Lesotho, Liberia, Madagascar, Mali, Mauritius, Mozambique, Namibia, Niger, Nigeria, Rwanda, Senegal, Seychelles, Sierra Leone, Somalia, South Africa, Swaziland, Togo, Uganda, United Republic of Tanzania, Zambia, Zimbabwe • 38 countries

Arab States: Algeria, Egypt, Jordan, Lebanon, Libya, Morocco, Oman, Palestine, Tunisia, United Arab Emirates • 10 countries

Asia and the Pacific: Afghanistan, Australia, Bangladesh, Bhutan, Cambodia, China, Cook Islands, India, Indonesia, Iran (Islamic Republic of), Japan, Kazakhstan, Kiribati, Malaysia, Myanmar, Nepal, Pakistan, Philippines, Republic of Korea, Sri Lanka, Tajikistan, Thailand, Turkey, Uzbekistan, Vanuatu • 25 countries

Europe and North America: Albania, Belgium, Bosnia and Herzegovina, Bulgaria, Canada, Croatia, Cyprus, Denmark, Estonia, Finland, France, Georgia, Germany, Hungary, Ireland, Israel, Italy, Latvia, Lithuania, Malta, Montenegro, Netherlands, Norway, Portugal, Republic of Moldova, Romania, Russian Federation, Serbia, Slovenia, Spain, Sweden, Switzerland, The former Yugoslav Republic of Macedonia, Ukraine, United States of America • 35 countries

Latin America and the Caribbean: Antigua and Barbuda, Argentina, Belize, Bolivia (Plurinational State of), Brazil, Chile, Colombia, Costa Rica, Cuba, Dominica, Dominican Republic, El Salvador, Guatemala, Haiti, Honduras, Mexico, Nicaragua, Panama, Paraguay, Peru, Saint Lucia, Suriname, Uruguay, Venezuela (Bolivarian Republic of) • 24 countries
GAP Key Partners are ensuring that ESD is integrated into national, regional and international policies related to education and sustainable development. Key Partners have produced numerous resources to ensure that education systems are prepared for emerging sustainability challenges.

Key partners attained 71% of their 2019 target by contributing to 432 strategic documents, including action plans, policies and curriculum frameworks.

Key partners reached 64% of their 2019 goal by supporting 701 ESD programmes designed to translate policies into action.

Example

With support from the Swiss Government, UN CC:Learn assists 16 countries in taking a strategic and results-oriented approach to climate change learning. National partners include Benin, Burkina Faso, Dominican Republic, Ethiopia, Ghana, Indonesia, Niger, Malawi, Uganda. UN CC:Learn also supports a regional programme implemented by the members of the Central American Integration System.
Transforming learning and training environments entails taking a holistic approach to ensure that every aspect of institutional life is guided by a sustainable mindset. The principles of sustainability come to life, reaching a larger number of learners than instruction alone.

3. **Number of learning institutions supported**

- **REPORTED**: 73,143 institutions
- **PLANNED**: 38,000 institutions

**Target**: 96,000 institutions

Key Partners helped 73,143 institutions implement long-lasting ESD activities, such as campus sustainability plans, reaching 76% of their 2019 target.

4. **Number of learners directly involved in partners’ activities**

- **REPORTED**: 2,400,000 learners
- **PLANNED**: 1,300,000 learners

**Target**: 3,300,000 learners

With more than 2.4 million learners involved in ESD activities by 2016, Key Partners reached 74% of their 2019 target.

**Example**

The Korean National Commission for UNESCO is implementing the ESD whole-school approach in UNESCO Associated Schools (ASPnet). All aspects of a school, including curriculum, extracurricular activities, teacher training, human resources, infrastructure, operations and processes aim to create a safe, climate-compatible and sustainable learning environment.
Building capacities of educators and trainers

Increase the capacities of educators and trainers to more effectively deliver ESD

Educators are key to the educational response to sustainable development. But they need to acquire knowledge, skills and values to integrate ESD principles into their practice. GAP Key Partners are helping educators become agents of change in schools and among their peers.

Key Partners made remarkable progress in training educators. At 88% complete, the 2019 target is well within reach.

Example

In the Southern Africa region, two GAP Key Partners, the Southern African Development Community (SADC) and the Swedish International Centre of Education for Sustainable Development (SWEDESD), are supporting the integration of ESD into teacher education. Currently, 40 Change Projects are underway, fostering the institutionalisation of ESD in teacher education settings.
Empowering and mobilising youth

GAP Key Partners are engaging with youth leaders and peer networks to inspire and empower young women and men to shape healthy, sustainable societies for future generations. Targets for this area are ambitious, underscoring the critical role of youth in meeting the GAP objectives.

7. Number of youth leaders supported by key partners

Key Partners met 52% of their 2019 target by involving more than 1.7 million youth in activities such as ESD advocacy, policy development and programmes.

8. Number of youth leaders trained as trainers

Key Partners trained more than 600,000 youth trainers, reaching 37% of their target. Slow progress suggests more needs to be done to attract and retain young leaders.

Example

In 2016, Untouched World Charitable Trust sent 120 youth leaders to an intensive GAP training programme in New Zealand. Participants plan to scale up by training youth in their home organizations. Five similar programmes have focused on leadership, sustainability, behaviour change and teamwork.
Communities are on the frontlines of some of the most pressing sustainability challenges, from pollution and coastal flooding to persistent poverty. In response, Key Partners are focused on activities that foster local ownership of sustainable development initiatives.

**Example**

The Namib Desert Environmental Education Trust, Namibia (NaDEET), is working with communities in the NamibRand Nature Reserve, a coastal desert region, to improve quality of life and protect the environment. Through 25 programmes at the NaDEET Centre and 54 action-oriented programmes in schools and communities, NaDeet has enabled more than 550 rural residents to acquire bottle skylights, fuel-efficient stoves, solar cookers and solar ovens.
Belonging to partner networks fuels ESD momentum

Key Partners report that their participation in the GAP has generated new momentum for collaboration and synergies to advance ESD across all sectors. An estimated 63% of Key Partners are working across Priority Action Areas to leverage the expertise of other networks. This has led to strong results; however, fundraising remains a barrier to scaling up joint work.

Benefit for GAP Key Partners

- Learn/share technical expertise from each other
- Develop joint projects or activities
- Enlarge communications outreach
- Fundraising

Policy Schools Teachers Youth Cities and Communities

Very helpful

© UNESCO/GAP Partner Networks meeting in Paris, 2016
The way forward

The mid-term review shows that GAP Key Partners have worked diligently to advance ESD globally. Their efforts cover at least two-thirds of countries. Collectively, Key Partners have engaged with more than six million learners, educators and other education stakeholders as well as thousands of institutions. They are on track to achieve their targets for 2019.

1. Continue monitoring efforts and develop a final report on the first phase of the GAP (2015-2019), which will measure quantitative and qualitative achievements. This will be harnessed and aligned with efforts to monitor SDG Target 4.7.

2. Enhance ESD capacity. UNESCO, together with GAP Key Partners and others, implements flagship projects in the five Priority Action Areas of the GAP with a focus on scaling up ESD action through strategic capacity-building initiatives for ESD actors.

3. Showcase good practices. The Programme will reward outstanding ESD work with future editions of the UNESCO-Japan Prize on Education for Sustainable Development and intensify ESD communications work through the GAP clearinghouse.

4. Plan for the future of ESD. UNESCO will organize a series of expert symposia and consultations with Member States and GAP Key Partners, which will culminate in a position paper on the future of ESD beyond 2019.
UNESCO-Japan Prize on ESD

Within the framework of the GAP, the UNESCO-Japan Prize honours outstanding ESD projects. The Prize consists of three annual awards of US$50,000 for each recipient. Funded by the Government of Japan, it was awarded for the first time in 2015. The uniqueness of this Prize is its programme approach, with support for activities and regular follow-ups with laureates beyond the award ceremony, including the organization of national and regional events.

</table>
This brochure illustrates the key findings and achievements resulting from a monitoring exercise conducted at the halfway point of the initial phase of the Global Action Programme (GAP).

While more work needs to be done to consolidate the accomplishments presented in this summary, GAP Key Partners and other stakeholders have made impressive gains against their commitments.

A clear learning agenda has emerged that will help ensure that ESD evolves, stays relevant and adds value to the full spectrum of Sustainable Development Goals.
